

Aon Risk Services

As you search for ways to drive efficiency and control costs, consider your current professional liability insurance. Does it offer the flexibility to address your clinic's wide range of needs and preferences? Does it deliver innovative pricing that reflects the realities of modern clinics? And does it provide valuable risk management tools for your corporate entity and your individual practitioners?

If you aren't sure, it may be time to find a single provider that can meet your needs across practitioners, offices, and states.

The Convenient Care Association (CCA) has partnered with Nurses Service Organization (NSO) and Aon Risk Services (ARS) to offer CCA members professional liability insurance and risk management resources. NSO is the largest provider of professional liability insurance to nurse practitioners with over 25,000 nurse practitioners insured. ARS has the expertise to deliver effective solutions for CCA members. Together, NSO and ARS have the experience and capability to provide custom insurance solutions for your convenient care clinic – no matter what size.

For start-up and smaller organizations, NSO has developed a proprietary pricing program for professional liability coverage **exclusively for CCA members**. Coverage is provided through an admitted carrier with an A rating and with limits of \$1 million per occurrence / \$5 million annual aggregate. For larger organizations, ARS will deploy its specialized convenient care centers brokerage practice to address the unique professional liability needs and exposures faced by more established CCA members.

Additionally, businesses and individuals will have the option to take advantage of risk management expertise. This includes risk management consulting services for convenient care businesses and continuing education courses provided online for Nurse Practitioners. Individual NPs receive a 10% non-cumulative premium discount for the following three years upon successful completion of a CE course.

Please go to the [NSO website](#) to learn more and apply for this program.
