

CareWorks Convenient Healthcare ("CareWorks") offers focused diagnostic and treatment services from a fixed service menu of common family illnesses and preventative health and wellness services. Each clinic is staffed by certified family nurse practitioners. These professionals collaborate with physicians from within Geisinger Health System or an affiliated health system partner, both locally (clinic visits, telephonic support) and electronically via Carework's state-of-the-art electronic health record. For more information see www.careworkshealth.com

CareWorks is owned and operated by Geisinger Health System ("Geisinger")— a Mid-Atlantic based integrated delivery system that includes a 600+ multi-specialty physician group practice, 3 hospitals, 41 ambulatory clinics, a health plan and two dedicated research centers. All of Geisinger's elements are linked together with one of the most sophisticated electronic health record platforms in the nation. In 2005, healthcare information firm Verispan named Geisinger among the top 25 in its IHN 100 report, an annual assessment of the 100 most highly integrated healthcare networks (IHNs). In addition, Geisinger has been named on multiple occasions as a 'Most Wired' Healthcare system by the American Hospital Association, and has been featured in articles on online medical records in the *Wall Street Journal* and *Modern Healthcare*.
