

Introduction to eScreen

Founded by Murray Lappe, M.D. in 1998, eScreen, Inc. develops and markets employment screening solutions for hiring and maintaining efficient workforces. eScreen is proprietary technology and software that creates a rapid, paperless web-based network for businesses seeking faster drug test and background check results. Dr. Lappe recognized the enormous potential in today's changing world of technology and implemented a unique combination of medical technology and information to create the eScreen solution. With a growing nationwide structure of eScreen Occupational Health Network (EOHN) locations and national account relationships, eScreen ranks as one of the largest Third Party Administrators in the country.

eScreen differentiates itself from the competition by providing the only instrumented point-of-collection test that provides negative drug test results in 15 minutes after test completion in a totally paperless, web-based platform. Screen-positive results are available within a 24-48 hour window. eScreen electronically transmits the result to the employer's online MyeScreen.com account for review and hiring management. As further differentiation, eScreen processes approximately 1.15 million electronic Chain-of-Custody events every year.

eScreen is committed to developing and delivering innovative products and services, which automate and streamline the employee screening process. eScreen combines cutting edge technology with superior customer service. eScreen has employed its proprietary rapid testing technology in over 1,400+ occupational health clinics nationwide. This technology creates the only paperless, web-based, nationwide network of collection sites for employers seeking faster drug test results in a paperless environment.

eScreen has been providing program solutions for companies seeking faster results and paperless transactions for the last 8 years. Since 1998 our offering has grown to encompass background checks in addition to our drug testing software, eScreen123, and our employee hiring management solution, MyeScreen.com.

Our Mission

eScreen is driven by the vision, passion and dedication of its employees, who are committed to developing and delivering innovative products and services which automate and streamline the employee screening process by combining cutting edge technology with superior customer service.
