

The need for affordable, high-quality health care has never been greater. Rising costs and restricted access have amplified that need. Take Care Health Systems has taken the lead in developing its own health care solution. Our approach recognizes the expertise and quality of care given by nurse practitioners while working with other health care professionals and insurers to ensure patient-focused integration of care. For more information see www.takecarehealth.com

Take Care Health Centers' Nurse Practitioners use sophisticated medical software to follow clear clinical protocols based on guidelines established by the medical community to diagnose, treat, and write commonly-used prescriptions for standard family illnesses. Illnesses treated by Take Care Nurse Practitioners include strep throat, eye, ear and sinus infections, seasonal allergies, poison ivy and other skin rashes, insect bites and urinary tract infections.

Take Care Health Systems will make a positive difference in the lives of patients by providing high-quality, easily accessible, and affordable health care to everyone. We focus on:

- Providing our patients with the highest level of care, and keeping their best interests at the center of our company and everything we do
- Inspiring our Take Care Nurse Practitioners so they can provide the highest level of patient care possible
- Ensuring a team-based approach with the medical community in providing exceptional patient care and continuity of care
- Surrounding ourselves with inspirational thought leaders
- Embracing new technologies and ideas to simplify and enrich the patient experience
- Creating strong collaborations, with a commitment to our business partners' success
