Company Type: Pharmaceutical

Years in Business: 8

Geographic Coverage: Continental United States and Puerto Rico

Company Description:

Adams Respiratory Therapeutics, Inc. (NASDAQ: ARxT) is a specialty pharmaceutical company focused on late-stage development, commercialization and marketing of over-the-counter (OTC) and prescription (Rx) pharmaceuticals for the treatment of respiratory disorders. We currently market ten products: Mucinex® SE, Mucinex® DM, Mucinex® D, Humibid® SE, two Delsym® products, and four products in our Children's Mucinex® line. In addition, we have several respiratory compounds in research development and we continue to look for business development and licensing opportunities to further broaden and strengthen our OTC and Rx pharmaceutical respiratory portfolio. We have built a core competency internally to drive our marketing success, and we look to our future with growing confidence and excitement as we work to create long-term stockholder value.

Company Type: Medical Device
Years in Business: 24
Geographic Coverage: World Wide

Company/Product Description:

Bionix® Medical Technologies designs, manufactures, and markets innovative, single-use medical devices.

Over twenty years ago Bionix Safe Ear Curettes™ changed the way primary care physicians removed cerumen. Today Bionix offers a complete line of safe cerumen removal products including Bionix Safe Ear Curettes, the original safe ear curette. Safe Ear Curettes are available in boxes of 50 per unique style or as a Variety Pack including all 7 styles, totaling 75 curettes.

The MDEA award winning Bionix Lighted Ear Curette™ with Magnification provides light and magnification where you need it most, in the ear canal. The Lighted Ear Curette is available in boxes of 50 per unique style or in a Variety Pack including all 7 styles, also totaling 50 curettes.

Prefer to irrigate? Bionix offers the OtoClear® Ear Irrigation Tip. Designed specifically for ear irrigation. The OtoClear Tip features three streams of water directed to the ear canal wall for safety and comfort as well as a flared design to prevent over insertion and back splash. OtoClear Irrigation Tips fit on any luer lock syringe or can be combined with a WaterPik® irrigation device for a stronger, pulsed lavage. Bionix offers a complete irrigation system that includes 1 Portable WaterPik Irrigation Device, 40 OtoClear Irrigation Tips, 3 Adapter Wands and 1 Bionix Ear Basin.

Visit www.BionixMed.com to view the complete product line.

Company Type: Pharmaceutical Manufacturer

Years in Business: Over 125

Geographic Coverage: National

Company Description:

We have a challenging and inspiring mission: to improve the quality of human life by enabling people to do more, feel better and live longer. This mission gives us the purpose to develop innovative medicines and products that help millions of people around the world. In fact, we are the only pharmaceutical company to tackle the World Health Organization's three 'priority' diseases – HIV/AIDS, tuberculosis and malaria.

Headquartered in the UK and with operations based in the US, we are one of the industry leaders, with an estimated seven percent of the world's pharmaceutical market. But being a leader brings responsibility. This means that we care about the impact that we have on the people and places touched by our mission to improve health around the world. It also means that we must help developing countries where debilitating disease affects millions of people and access to life-changing medicines and vaccines is a problem. To meet this challenge, we are committed to providing discounted medicines where they are needed the most.

As a company with a firm foundation in science, we have a flair for research and a track record of turning that research into powerful, marketable drugs. Every hour we spend more than £300,000 (US\$562,000) to find new medicines. We produce medicines that treat six major disease areas – asthma, virus control, infections, mental health, diabetes and digestive conditions. In addition, we are a leader in the important area of vaccines and are developing new treatments for cancer.

Company Type: Real Estate Project Management

Years in Business: Over 200

Geographic Coverage: International

Company Description:

Jones Lang LaSalle (NYSE: JLL), the only real estate money management and services firm named to FORTUNE magazine's "100 Best Companies to Work For" and Forbes magazine's "400 Best Big Companies," has approximately 150 offices worldwide and operates in more than 450 cities in over 50 countries. With 2006 revenue of over \$2.0 billion, the company provides comprehensive integrated real estate and investment management expertise on a local, regional and global level to owner, occupier and investor clients. Jones Lang LaSalle is an industry leader in property and corporate facility management services, with a portfolio of over 1.0 billion square feet worldwide.

Servicing Multi-Site Convenient Care Facilities

Jones Lang LaSalle provides Project Management Services to clients in the United States through a network of over 900 Project Managers who are all employees of the firm. We provide our clients local knowledge, the tools and processes of a national platform and the buying power of an international marketplace.

We are serving the convenient care industry through our Multi-Site Program Management group. Multi Site Program Management is the practice of managing the same (or similar) scope of work at multiple locations simultaneously, using centralized scheduling, reporting, and procurement procedures.

Jones Lang LaSalle is currently managing or recently managed (within the last year) Multi-site Programs for hundred of clients in over 7,000 locations throughout the United States and internationally. Those clients include Care Clinic Inc., Sprint, Starbucks, Regions Bank, and Bank of America.

Company Type: Spirometer design and manufacturing
Years in Business: 90 years
Geographic Coverage: International

Company Description:

Spirometry, a simple, 5-minute, non-invasive test that measures breathing capacity is the gold standard for the diagnosis and management of both Asthma & COPD, and a powerful motivator for smoking cessation programs.

Jones Medical has been at the forefront of spirometry design and manufacturing since its inception; delivering technology that has extended its application from pulmonary labs to the physician office setting, and recently into the consumer screening environment.

Jones Medical is a privately held business located 20 miles west of Chicago in Oak Brook, Illinois. With over 90 years of pulmonary diagnostic research, development, and manufacturing experience, we have become today's most desired company for spirometry program development, staff training, product support, and reimbursement guidance.

The utilization of simplistic spirometry screening in Retail Health Clinics would greatly benefit patients, help meet an unmet primary care need, build rapport with physicians, and drive patient traffic, while meeting practice guidelines.

Kes Air Technologies

3625 Kennesaw N Industrial Parkway

Kennesaw, GA 30144

Phone: (770) 427-6500

Fax: (770) 425-0837

Website: www.kesair.com and www.airocide.com

Contact Person: David W. Heffner, Executive Vice President

Contact Person's Phone: (770) 730-9816

Contact Person's E-mail: dheffner@kesair.com

Company Type: Manufacturer of Air Purification Systems

Years in Business: 20

Geographic Coverage: North America and select countries in Europe

Company Description:

AiroCide® Photocatalytic Air Purifying Systems are the only air purifiers that completely destroy airborne bacteria, mold, fungi, viruses, volatile organic compounds (VOC's) & odors. Because the technology in these systems was developed by NASA, they are not filtering systems and produce no harmful byproducts like ozone; they are superior to any other air purifiers or sanitizers on the market.

The *AiroCide* technology is used to provide clean air in a variety of industries including perishable foods, beverages and flowers; dental and healthcare; consumer, and many more.

The *AiroCide* technology originated when NASA needed help with food growth experiments as part of its extended space flight research. One of NASA's Commercial Space Centers in Madison, WI, the Wisconsin Center for Space Automation and Robotics (WCSAR), along with the University of Wisconsin-Madison (UW), developed a unique Photocatalytic oxidation technology that removed a gas called ethylene that makes plants deteriorate.

The patented technology combines two known pathogen-killing techniques, Photocatalytic oxidation (PCO) and ultraviolet light to destroy harmful airborne microbes. A titanium dioxide photocatalyst is used in the PCO process. These active elements will oxidize VOC's and kill and decompose airborne pathogens. The PCO process used in *AiroCide* air purifying systems is truly innovative and not found in any other air cleaning products.

The product application of the technology is vast, ranging from medical-healthcare (The *AiroCide* system is an FDA Class II listed medical device) to many commercial, government and residential uses for infection control, terrorism preparedness functions and indoor air quality.

Kirkpatrick & Lockhart Preston Gates Ellis LLP

Kirkpatrick & Lockhart Preston Gates Ellis LLP

(“**K & L Gates**”)

17 North Second Street, 18th Floor

Company Type: Law Firm

Years in Business: 61

Geographic Coverage: Regional, National, International

Company Description:

K&L Gates comprises approximately 1,400 lawyers who practice in offices located in Anchorage, Beijing, Berlin, Boston, Coeur d'Alene, Dallas, Harrisburg, Hong Kong, London, Los Angeles, Miami, Newark, New York, Orange County, Palo Alto, Pittsburgh, Portland, San Francisco, Seattle, Spokane, Taipei and Washington. K&L Gates represents capital markets participants and leading global corporations, growth and middle-market companies, and entrepreneurs in every major industry group as well as public sector entities, educational institutions and philanthropic organizations. Our practice is at once regional, national and international in scope, cutting edge, complex, and dynamic.

Our Health Care group assists with start-up, organization, and financing of new ventures and emerging businesses such as convenient care clinics in both the retail and corporate environments. The firm's health care lawyers work with clients to maintain and improve operations, through expansions and modifications, in compliance with existing requirements. We assist our clients in responding to new and amended laws and policies by recommending approaches to adapting to the changes. We pride ourselves on delivering strategic, accurate, practical advice grounded in a thorough understanding of our clients' endeavors and goals.

Contact Person: Michael L. Boner, Director of National Accounts

Contact Person's Phone: (410) 817-4693

Contact Person's E-mail: mboner@matritech.com

Company Type: Healthcare Manufacturer (Rapid Diagnostics)

Years in Business: 19

Geographic Coverage: International

Company Description:

Matritech is using its patented proteomics technology to develop diagnostics for the detection of a variety of cancers. The Company's first two products, the NMP22® Test Kit and NMP22® BladderChek® Test, have been FDA approved for the monitoring and diagnosis of bladder cancer.

The NMP22 BladderChek Test is based on Matritech's proprietary nuclear matrix protein (NMP) technology, which correlates levels of NMPs in body fluids to the presence of cancer. Beginning with a patent portfolio licensed exclusively from the Massachusetts Institute of Technology (MIT), Matritech's patent portfolio has grown to 14 other U.S. patents. In addition to the NMP22 protein marker utilized in the NMP22 Test Kit and NMP22 BladderChek Test, the Company has discovered other proteins associated with cervical, breast, prostate, and colon cancer.

The Company's goal is to utilize protein markers to develop, through its own research staff and through strategic alliances, clinical applications to detect cancer. More information about Matritech is available at www.matritech.com.

NMP22 and BladderChek are registered trademarks and "More Complete. No Doubt" is a trademark of Matritech, Inc.

Company Description:

About MedImmune

MedImmune strives to provide better medicines to patients, new medical options for physicians and rewarding careers to employees. Dedicated to advancing science and medicine to help people live better lives, the company is focused on the areas of infectious diseases, cancer and inflammatory diseases. With approximately 3,000 employees worldwide and headquarters in Maryland, MedImmune is wholly owned by AstraZeneca plc (LSE: AZN.L, NYSE: AZN). For more information, visit MedImmune's website at <http://www.medimmune.com>.

About FluMist

FluMist® (Influenza Virus Vaccine Live, Intranasal) is *the only nasal-spray influenza vaccine* approved in the United States to help prevent influenza in eligible individuals ages 2 to 49 years old.

Different from the flu shot, FluMist is designed to stimulate an immune response that closely resembles the body's natural reaction to an infection by using a live, weakened virus. In September 2007, the U.S. FDA approved the expanded use of FluMist in eligible children 2 to 5 years old. These children now have a nasal-spray option for flu vaccination. Previously, only one flu vaccine option – the traditional flu shot – was available for children under the age of 5. In January 2007, the U.S. FDA approved a refrigerated formulation of FluMist that makes it more easily stored by healthcare professionals, pharmacies, clinics and schools. Previously, FluMist needed to be stored frozen.

Do not administer FluMist to children less than 24 months of age due to an increased risk of hospitalization and wheezing that was observed in clinical trials. FluMist should not be administered to any individual with asthma and to children less than 5 years of age with recurrent wheezing unless the potential benefit outweighs the potential risk. Do not administer FluMist to individuals with severe asthma or active wheezing. Please see full Prescribing Information for FluMist, call 1-877-FLUMIST (358-6478) or visit www.FluMist.com for additional safety information.

Company Type: PUBLISHER OF CLINICAL RESEARCH AND INFORMATION TO
PRACTICING SCHOOL NURSES

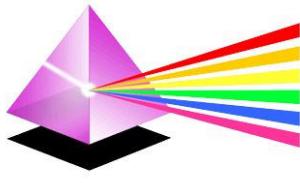

Years in Business: 20

Geographic Coverage: All United States and Limited International

Company/Product Description:

School Health Alert is the nation's oldest, largest and most respected independent newsletter providing current clinical information to practicing school nurses. Our print newsletter has a paid circulation of approximately 8,000 school nurses, nurse practitioners and public health nurses that practice within the K-12 school setting. Through our website, www.schoolnurse.com and accompanying electronic weekly newsletter, we offer corporate sponsorships/advertising to firms wishing to reach this very influential market. Our website is the top ranked, non-paid, school nurse site by all the major search engines.

We provide an immediate vehicle for reaching this natural source of local referrals and even potential nurse staff for Convenient Care Clinics.

Company Type: 1. Patient Education/Consumer Health Information
2. Custom Consumer Health Marketing Programs

Years in Business: 34

Geographic Coverage: US and Canada

Company Description:

StayWell is the consumer division of MediMedia USA, the world's largest provider of consumer health information and patient education. MediMedia distributes print and online health media to physicians, hospitals, health systems, managed care plans, retail chains, and employer groups throughout the United States.

In addition to our extensive roster of clients at leading healthcare organizations, we are the publishing partner for such prestigious associations as the American Red Cross, AARP, Harvard Medical School, the American Heart Association, the American Lung Association, the American College of Physicians, and the American Diabetes Association. StayWell is exclusively dedicated to developing health communication solutions that are accurate, easy to understand and behavior-change focused. We offer unparalleled editorial experience, commitment to accuracy and richness of presentation.

StayWell companies providing innovative ways for retail organizations to make caring health connections to consumers include:

StayWell Custom Communications (SCC) is the leading provider of custom consumer health marketing and communications solutions for hospitals, health systems, managed care organizations, retailers and employers in the United States. Since 1984, SCC has been dedicated exclusively to developing original health and wellness content for healthcare organizations. Year after year, industry competitions recognize the quality of our work with more awards than any other company in the field. Our comprehensive print and online capabilities enable clients to deliver their unique healthcare messages to their targeted consumer populations in a seamlessly integrated manner.

Krames publishes more than 1,500 single-topic booklets, brochures, tear sheets and online products about diseases, chronic conditions and medical procedures. Krames' comprehensive product line reaches virtually every level of health and safety management. Since 1974, Krames materials have worked to promote healthy lifestyles, improve productivity, educate patients and consumers, enhance the efficiency of health care services and reduce health care costs.

Contact Person: Daniel Boelman RN, BSN, Customer Service Manager

Contact Person's Phone: (515) 267-8031

Contact Person's E-mail: dboelman@zanfel.com

Company Type: Consumer Health Products

Years in Business: 9

Geographic Coverage: National

Company Description:

Zanfel Laboratories is dedicated to producing high quality dermatological consumer products. The premier product developed by the company is also the name of the company, Zanfel.

Zanfel Poison Ivy, Oak & Sumac Wash is the only product clinically shown to remove urushiol (yoo-ROO-shee-ol), the toxin found in poison ivy, oak, and sumac, ANYTIME after outbreak. Zanfel relieves itching in 30 seconds. Zanfel is an evidence based product that is a safer more effective option than the steroids or antihistamines commonly prescribed for poison ivy, oak and sumac. Zanfel is safe for the face and genitals. Zanfel is safe to be used on children, and pregnant or nursing women. Zanfel is a non-prescription product sold in the first aid section of your local pharmacy. Zanfel is sold in one ounce tubes that provide approximately 15 applications the size of an adult hand or face. The product has a 10 year shelf life.

Zanfel is committed to educating patients and healthcare providers on the subject of urushiol induced contact dermatitis. Zanfel can provide convenient care clinics with educational materials for patients and healthcare providers on the prevention, identification, and treatment of poison ivy, oak, and sumac.

Please contact us at 1-800-401-4002 or visit www.zanfel.com for sales and product information.

Convenient Care Association

2008 CCA VENDOR DIRECTORY

Listing your company in the 2008 CCA Vendor Directory gives you special access to the leaders of the emerging Convenient Care Industry. The 2008 CCA Vendor Directory is published electronically, updated regularly, and shared with all CCA Members and Associate Members.

To be included in future editions of the CCA Vendor Directory, please contact Anne Lynn at anne@ccclinics.org or (215) 985-2515 and request an electronic copy of the Vendor Directory Application.

Please note that inclusion in the CCA Vendor Directory does not constitute CCA endorsement of your company, organization, or product.
